

Prague 18th January 2021
Ev.No.: MZP/2021/780/120

Withdrawal of the Application for Adjustment of the NO_x Emission Inventories

Dear Sir,

the Czech Republic hereby withdraws the application for the adjustment of the NO_x emission inventories according to the Article 4 Par. 3 d) of the Directive 2284/2016 allocated in the category Manure Management 3B of NFR 2019.

The Czech Republic applied for the above mentioned adjustment on the 13th March 2020 when it submitted the Adjustment Application (Annex II to ECE/EB.Air/130) along with the Informative Inventory Report and the emission inventory for the time period of 1990-2018.

Because the conditions for such application were not met, please consider the Czech Republic's application withdrawn. This withdrawal does not apply for the VOC emission adjustment in the same sector.

Yours Sincerely,

Kurt Dědič
