Report for the Stage 3 *ad-hoc* review of emission inventories submitted under the UNECE LRTAP Convention:

2023

MALTA

FINAL REPORT

CONTENT

INTRODUCTION
PART A: GENERAL RECOMMENDATIONS FOR THE CHAPTER AGRICULTURE5
PART B: SPECIFIC RECOMMENDATIONS FOR THE SECTOR AGRICULTURE6
PART C: SPECIFIC RECOMMENDATIONS FOR THE GRIDDED EMISSION DATA FOR THE SECTOR AGRICULTURE9
REVISED ESTIMATES AND TECHNICAL CORRECTIONS CONSIDERED AND/OR CALCULATED BY ERT11
LIST OF MATERIALS PROVIDED TO ERT12
LIST OF ADDITIONAL MATERIALS PROVIDED BY THE COUNTRY DURING THE REVIEW12
ANNEX I TECHNICAL CORRECTIONS AND REVISED ESTIMATES 13
ABBREVIATIONS14
LIST OF REFERENCES AND SUPPORTING DOCUMENTS 16

INTRODUCTION

- 1. The mandate and overall objectives for the emission inventory review process under the LRTAP Convention is given by the UNECE document 'Updated methods and procedures for the technical reviews of air pollutant emission inventories reported under the Convention'(1) hereafter referred to as the 'Review Guidelines 2018'.
- 2. Paragraph 7 (c) of the 'Review Guidelines 2018' defines that Stage 3 Reviews may be annual centralized reviews or ad hoc reviews. Paragraph 18 of the 'Review Guidelines 2018' further specifies that such ad hoc reviews could, for instance, focus on specific source sectors, specific pollutants such as heavy metals or persistent organic pollutants, gridded and projections data, or on other areas as requested by the Implementation Committee and that where appropriate, ad hoc reviews could be conducted in line with the present Methods and Procedures for the In-depth (Stage 3) review.
- 3. At its eighth joint session in September 2022, the Steering Body and the Working Group on Effects approved the plan that the in-depth review in 2023 focuses on emissions from agriculture with a special emphasis on ammonia, NMVOC and NO_x emissions including gridded data. While the focus was set on NH₃, NMVOC and NO_x emissions, also all other pollutants covered by LRTAP Convention and its protocols (i.e. SO_2 , NOx, NMVOC, NH_3 , plus PM_{10} $PM_{2.5}$, BC, priority HMs and POP_s) have been checked for the time series years 1990 2021 to the extent possible. For these other pollutants especially completeness of reporting was assessed.
- 4. This report covers the results of the Stage 3 Review (ad hoc review) 2023 of Malta's air emission inventory submitted under the UNECE LRTAP Convention. The review was coordinated by the EMEP Centre on Emission Inventories and Projections (CEIP) acting as Review Secretariat. The review took place between April and June 2023 and was performed as a desk review between 31 March to 5 May 2023 and an in-person meeting between 22 of May 2023 and 26 May 2023 (centralized review). The following team of nominated experts from the Roster of Experts performed the review.

Agriculture experts:

Ms. Armine ARTENYAN (Republic of Armenia)

Ms. Ajla BASOVIC (Montenegro)

Ms. Aleksandra NESTOROVSKA-KRSTESKA (North Macedonia)

Mr. Lasha AKHALAIA (Georgia)

¹ Decision 2018/1 adopted by EB: *Updated methods and procedures for the technical review of air pollutant emission Inventories reported under the Convention.* ECE/EB.AIR/142/Add.1 http://www.unece.org/fileadmin/DAM/env/documents/2002/eb/air/EB%20Decisions/Decision_2018_1.pdf

- Mr. Hakam AL-HANBALI (Sweden)
- Ms. Susana LOPEZ-APARICIO (EU/ETC(EEA))
- Ms. Simone MAYER (Austria)
- Ms. Andjelka RADOSAVLJEVIC (Serbia)
- Ms. Kristina Tonhauzer (Slovakia)
- Mr. Tim VAN DER ZEE (Netherlands)

Experts for gridded emission data:

- Ms. Christine BRENDLE (Austria)
- Mr. Christopher EVANGELIDES (United Kingdom)
- Mr. Christian MIELKE (Germany)
- 5. Mr. Ben RICHMOND (United Kingdom), Ms. Rikke ALBREKTSEN (Denmark), Mr. Etienne MATHIAS (France), Ms. Kristina SAARINEN (Finland) were the lead reviewers. The review was coordinated by Ms. Sabine Schindlbacher and Mr. Bernhard Ullrich (EMEP Centre on Emission Inventories and Projections CEIP).
- 6. The review was performed on the basis of CLRTAP emission data officially reported by Malta, due by 15 February 2023. The Informative Inventory Reports (IIR), reported due by 15 March 2023 under the CLRTAP, informed the review.
- 7. The EMEP/EEA Guidebook 2019² was used as a base for the review.
- 8. The emission inventory of Malta was received on 28 February 2023 and thus not by the deadline of 15 February. The Informative Inventory Report was not received before the end of the review 2023 review and thus not by the deadline of 15 March.

Malta 2023 Page 4 of 16

² EMEP/EEA: EMEP/EEA air pollutant emission inventory guidebook 2019, EEA Report No. 13/2019 European Environment Agency, Copenhagen. Available at: https://www.eea.europa.eu/publications/emep-eea-guidebook-2019 EU 2019

PART A: GENERAL RECOMMENDATIONS FOR THE CHAPTER AGRICULTURE

- 9. The ERT recognises the level of effort undertaken by Malta in providing an inventory including a significant level of detail.
- 10. Yet, the IIR submission 2023 was not available for review in 2023 (submitted 12 July 2023). The ERT could not assess the quality in terms of completeness, accuracy, comparability and consistency.

To improve the overall quality of the agriculture air emission inventory the ERT recommends Malta to:

- provide a detailed description of applied methodologies, data sources, choice of emission factors and activity data for all categories in the IIR
- submit the IIR within the deadlines set up in the UNECE reporting Guidelines.

Malta 2023 Page 5 of 16

PART B: SPECIFIC RECOMMENDATIONS FOR THE SECTOR AGRICULTURE

11. Table 1 provides the findings from the 2023 CLRTAP Stage 3 Review including those not implemented from previous CLTRAP Stage 3 Reviews. While the focus was set on NH₃, NMVOC and NO_x emissions, also all other pollutants covered by the LRTAP Convention and its protocols (i.e. SO_2 , NO_x , NMVOC, NH_3 , plus PM_{10} $PM_{2.5}$, BC, priority HMs and POP_S) have been checked for the years 1990 - 2021 to the extent possible, especially regarding the completeness of reporting. The implementation of the recommendations will be followed up in a future CLRTAP inventory review.

Malta 2023 Page 6 of 16

Table 1: Findings from the CLRTAP Stage 3 Review 2023 for the Sector Agriculture³

ID	Pollutants	NFR category	Key Category	Tier level	Туре	TAC ₁ C ₂ C ₃
MT-2023-3D-1	NO _x , NH ₃ , PM _{2.5}	3Da2a	No	indeterminate	R	Т

Observation

The ERT noted that for category 3Da2c "Other organic fertilizers applied to soils (including compost)" Malta used the notification key IE for the pollutants NO_x, NH₃ and PM_{2.5}, but it is not clear where these emissions are included. During the review, Malta explained that emissions from category 3Da2a are covered by NFR category 3Da1, as emissions from 3Da1 include all emissions of nitrogen applied to soil, excluding manure.

Recommendation

The ERT recommends that Malta provide information on where NO_x, NH₃ and PM_{2.5} emissions from NFR category 3Da2c are included in the next submission in its IIR.

ID	Pollutants	NFR category	Key Category	Tier level	Туре	TAC ₁ C ₂ C ₃
MT-2023-3B-1	NH ₃	3B	Yes	indeterminate	R	Т

Observation

The ERT noted that Category 3B manure management is the dominant source of NH₃ emissions, but it is not clear which Tier is used for the

The findings have been assigned to one or more of the following criteria: TACCC T (Transparency), A (Accuracy), C₁ (Completeness), C₂ (Comparability), C₃ (Consistency) for definitions of these criteria see EMEP/EEA Guidebook 2019

³ Note: There are four possible types of findings: R: Recommendation, TC: Technical Correction, PTC: Potential Technical Correction; RE: Revised Estimate

calculation. During the review Malta explained that NH₃ emissions from 3B manure management are estimated at Tier 2 using the N flow tool and that it will be presented in IIR.

Recommendation

In order to make the Inventory transparent, the ERT recommends that Malta should include an explanation in the next submission on which Tier of emission calculations is used for this dominant sector.

Malta 2023 Page 8 of 16

PART C: SPECIFIC RECOMMENDATIONS FOR THE GRIDDED EMISSION DATA FOR THE SECTOR AGRICULTURE

- 12. For the 2023 Review of the gridded emission data the focus was set on NH_3 , NMVOC, NO_x and $PM_{2.5}$ emissions
- 13. The methods used by Malta to grid sectoral emissions are described transparently in the IIR
- 14. The description includes data sources that have been used for spatial distribution.
- 15. Gridded emissions reported for GNFR K_AgriLivestock and L_AgriOther are consistent with the corresponding NFR categories reported in Annex I.
- 16. Table 2 provides the findings of the ERT related to the gridded data. For Malta, no recommendations were provided by the ERT for this review.

Table 2: Findings from the CLRTAP stage 3 review 2023 for gridded emissions from the sector agriculture⁴

ID	Pollutants	GNFR category	TAC ₁ C ₂ C ₃
No recommendation			

⁴ The findings have been assigned to one or more of the following criteria: TACCC T (Transparency), A (Accuracy), C₁ (Completeness), C₂ (Comparability), C₃ (Consistency) for definitions of these criteria see EMEP/EEA Guidebook 2019

REVISED ESTIMATES AND TECHNICAL CORRECTIONS CONSIDERED AND/OR CALCULATED BY ERT

- 17. In the Appendix of the 'EMEP/UNECE Review Guidelines 2018⁵' it is stated that if the ERT considers that emissions are significantly under- or overestimated, the Party is during the review invited to submit 'Revised Estimates' that address the issue raised. Should the Party decline to do this, or should it not be possible to agree on the quantification of a Revised Estimate i.e. the ERT does not accept a Revised Estimate provided by the Party, the ERT may calculate a 'Technical Correction'. The threshold for significance for a Technical Correction for the in-depth review in 2023 was set at 2% of the national total, i.e. a finding that has been identified to result in an over- or underestimate of emissions of more than 2% of the national total. The methods for calculating Technical Corrections are set up in the 'EMEP/UNECE Review Guidelines 2018' and use the EMEP/EEA Emission 'Inventory Guidebook' as a reference for methods and emission factors.
- 18. The ERT did not calculate any Technical Corrections and Malta did not provide any Revised Estimates.

LIST OF MATERIALS PROVIDED TO ERT

- 1. Malta Annex I reporting template
- 2. Malta Stage 2 S&A report
- 3. Malta Stage 1 report 2023
- 4. Malta IIR 2023
- 5. Repdab-Report
- 6. Extended checks

LIST OF ADDITIONAL MATERIALS PROVIDED BY THE COUNTRY DURING THE REVIEW

- 1. Responses to the question raised by ERT during the review.
- 2. Material received from the Party during the Review
 - No additional information was provided by the Party either before or during the review.

Malta 2023 Page 12 of 16

ANNEX I TECHNICAL CORRECTIONS AND REVISED ESTIMATES		
The ERT did not calculate any Technical Corrections and Malta did not provide any Revised Estimates.		

ABBREVIATIONS

This list includes abbreviations commonly used in the Review Reports

AD	Activity data	
BaP	Benzo[a]pyrene	
BC	Black Carbon	
С	Confidential	
Cd	Cadmium	
CEIP	Centre on Emission Inventories and Projections	
	Convention on Long-range Transboundary Air	
CLRTAP	Pollution – 'the Air Convention'	
CO	Carbon Monoxide	
E-PRTR	European Pollutant Release and Transfer Register	
EEA	European Environment Agency	
EF	Emission factor	
EMEP	The co-operative programme for monitoring and evaluation of the long-range transmission of air pollutants in Europe (unofficially 'European Monitoring and Evaluation Programme' = EMEP)	
ERC	Emission Reduction Commitment	
ERT	Expert Review Team	
GHG	Greenhouse gas	
GIS	Geo Information System	
GNFR	NFR Aggregation for Gridding and LPS	
HCB	Hexachlorobenzene	
Hg	Mercury	
НМ	Heavy metals	
IEF	Implied emission factor	
kt	Kilotonnes	
LPS	Large Point Sources	
NA	Not applicable	
NE	Not Estimated	
NECD	National Emission reduction Commitments Directive	
NFR	Nomenclature for reporting	
NH ₃	Ammonia	
NMVOC	Non-methane volatile organic compounds	
NO	Not Occuring	
NO _x	Nitrogen oxides	
NR	Not relevant/Not Reported	
PAHs	Polycyclic aromatic hydrocarbons	
Pb	Lead	
PCB	Polychlorinated biphenyls	
PCDD/F	Polychlorinated dibenzo-p-dioxins and dibenzofurans	
PM ₁₀	Fine particulate matter: particles with an aerodynamic diameter equal to or less than 10 micrometres (µm)	

PM _{2.5}	Fine particulate matter: particles with an aerodynamic diameter equal to or less than 2.5 micrometres (µm)
POPs	Persistent organic pollutants
PTC	Potential technical correction
RE	Revised estimate
SO ₂	Sulphur dioxide
SO _x	Sulphur oxides
TC	Technical correction
TSP	Total suspended particulates
