

IIR under the LRTAP Convention

Executive Summary

Updated as of February 2024.

This Informative Inventory Report provides a complete and comprehensive description of the methodology guiding the development of the inventory of emissions resulting from industrial processes, agricultural activities and waste disposal within the European territory of Russia (ETR) in 2022.

The ETR includes 58 regions of the Russian Federation located in 5 Federal Districts, such as: Central, North-Western, Southern, North-Caucasian and Volga.

The 2024 reporting includes provision of the national emission inventory according to the Nomenclature for Reporting (NFR) in the NFR 2019-1 format for the 2022 year.

The inventory includes national emissions of sulfur compounds (SO₂) and nitrogen oxides (NO_x), which the Russian Federation must provide annually in accordance with the requirements of ratified protocols.

This inventory is based on national statistics data regarding emissions from both stationary and mobile sources.

This report was prepared in accordance with the Guidelines for Reporting Emissions and Projections Data under the Convention on Long-range Transboundary Air Pollution (ECE/EB.AIR/GE.1/2022/20–ECE/EB.AIR/WG.1/2022/13).
